TRANSFORMATION UNDERWAY

PLAN A REPORT
2018
INTRODUCTION

Our customers’ world is changing fast. They are living through a period of great political, social and technological change.

THEY’RE LOOKING FOR ORGANISATIONS THEY CAN TRUST TO OFFER LEADERSHIP, NOW AND IN THE FUTURE. MARKS & SPENCER HAS BEEN AT THE FOREFRONT OF SOCIAL CHANGE FOR 134 YEARS, AND WE’RE DETERMINED TO PLAY A LEADING ROLE IN THE YEARS AHEAD.
**THE FIRST YEAR OF PLAN A 2025**

Every aspect of the retail sector is being disrupted. The shift to online shopping, the focus on price, the growing importance of services rather than physical products, the rising use of automation and robotics, the personalisation of products – no shortage of challenges.

And that means we have to keep on transforming business, in a timely and cost-effective way, even as we put the highest priority on our strong social, ethical and environmental values. Plan A 2025 is at the very heart of what we’re doing here. It’s helping us to stay relevant with our customers as they seek greater value, quality and ethical performance from retailers.

We’re proud of the fact that Plan A is regarded so highly by our external stakeholders – which keeps the pressure on us to keep on raising our game! But it also matters greatly to me that our internal stakeholders feel more engaged with the business.

So when we updated Plan A in June 2017, we shaped it around three bold goals to be achieved by 2025: to help 10 million people live happier and healthier lives; to help transform 1,000 communities; to become a zero-waste business.

One year on from launch, these goals seem even more relevant, and we’ve made steady progress towards them.

But for me, success is about more than the number of commitments we’ve met. It’s about the bigger picture – engaging our customers and integrating Plan A 2025 into how we do business. And on both these strategic fronts we’ve also made progress, though I’m the first to acknowledge that things do not always move as fast as we would like.

In June 2017, we launched a major customer engagement programme to share our Plan A story in-store, via our digital retail channels and social media. The response from our customers was hugely encouraging – for example, we achieved our highest ever ‘open’ rate for an email telling the story of what our stores are doing in their local communities. This was sent to six million Sparks card customers.

We also engaged directly with our employees, with our stores getting stuck into new community projects. More than 90% of our colleagues who took part in these projects told us this made them feel more engaged with the business.

No illusions here: we’re a very down to earth retailer, and I would describe these achievements as no more than small steps along the road. But they’ve given us some real momentum around engagement. We’ve known for a long time that we had to do better in addressing these challenges, without putting all our energy into technical delivery, internal target-setting and so on.

The past year has been incredibly fluid – politically, economically, socially, technologically and environmentally. And I think we can pretty much guarantee that it’s going to stay that way for the foreseeable future.

But one thing is clearer now than ever before: in this turbulent and volatile world, Plan A 2025 provides the deep social purpose we need to ‘anchor’ the M&S brand for customers and colleagues alike, giving practical expression to the enduring values that underpin everything this company does.

---

**WHAT CUSTOMERS HAVE TOLD US**

- **How customers define themselves**
  Customers now define themselves more in terms of attitude than age. We can help them get the most out of life, no matter how young or old they are.

- **Meaningful connections**
  Customers want more meaningful connections with other people and with the world around them.

- **Making a difference**
  Customers want us to make it easier for them to do the right thing and make a difference.

- **Tackling injustice**
  They’re increasingly aware of injustice, particularly at a local level, and these issues are the ones customers also feel empowered to tackle.

- **Scrutinising businesses**
  Customers expect that businesses will be highly scrutinised to ensure they do the right thing – but also hope that retailers will use their power to promote wider changes for good in society.

- **The quality of products**
  Our customers value quality – they really care about how products are made.
"Plan A 2025 moves us on another step towards becoming a sustainable business."

WHY PLAN A 2025 AND WHY NOW?

We launched Plan A 2025 in June last year. Our Plan A 2020 commitments were coming to their conclusion and we were clear that our future activities needed more ambition, a faster pace and greater scale. It was important for us to put our customers at the heart of our thinking and so we designed Plan A 2025 to meet their future needs. We recognised that after 10 years of incremental change, we needed to become more disruptive and transformative; that we needed to imagine the world in 2025 and change our business accordingly, rather than focusing on the next two or three years.

After extensive consultation during 2016 and 2017, we crystallised the latest version of Plan A under three pillars, supporting three main goals: helping 10 million people live happier, healthier lives; transforming 1,000 communities; and becoming a zero-waste business (see left).

The past year has shown that the future social and environmental issues we anticipated and set out to address in Plan A, are now playing out in our customers' lives, in government regulation and in business.

2017 saw the introduction of a new sugar tax, heightened media focus on the NHS, and a growing incidence of mental illness – all of which show how the debate about caring for a growing, ageing population is fast becoming part of our customers’ lives. Similarly, the widely reported demise of traditional high street retail, points towards a very different future for local communities.

Our Goal
Our goal is to help 10 million people live happier, healthier lives.

Many communities will take this transformation in their stride, but for some, losing the traditional high street shops that have anchored the community for decades presents a significant social challenge.

Transparency, once a matter of choice for some businesses, is increasingly becoming a basic social expectation, prompting greater public debate and accelerating action on issues such as the gender pay gap and modern slavery. An equally vociferous national debate has been sparked by Sir David Attenborough's Blue Planet II documentary series, which highlighted man-made threats to the world’s oceans, such as overfishing, acidification, and most significantly, our use of plastic.

If all these issues were not enough to deal with, the retail industry is also experiencing rapid change and M&S has embarked on a new transformational business strategy. Launched in November 2017, this focuses on taking three steps: restore the basics; shape the future; and (within the next four years) make M&S special again. You can read more about how Plan A will support each of these steps on pages 6 and 7. We are accelerating our plans to make M&S special again through sustainable, profitable growth as a business that makes a positive impact on our customers' wellbeing, communities and the planet. Plan A has always provided a bridge between our customers’ lives and M&S. Through Plan A we anticipate and respond to the shifting forces that shape our customers’ lives: we spot and reduce emerging risks; we find new ways to satisfy their needs and support their aspirations. The insights we’ve gained have inspired Plan A 2025.
WHAT STAKEHOLDERS HAVE TOLD US

- How we can impact people's lifestyles
  M&S can play a bigger role in enabling more sustainable, healthy lifestyles.
- Our focus
  Plan A 2025 must focus on our customers and be integrated into our brand purpose.
- Future areas of interest
  There are big opportunities to be explored in the circular and sharing economies.
- The importance of sustainability
  We must continue to focus on incorporating sustainability in our supply chain. Key issues include living wage, conserving water and improving communities. We should also focus on more sustainable packaging.
- The importance of local communities
  We should use our significant physical retail presence to play a greater role in connecting initiatives at a local level.
- How we can improve our communication
  We should increase collaborations, partnerships and advocacy to ensure the M&S voice is heard more clearly.
- The example we need to set
  We're expected to be transparent and are encouraged to talk even more frankly about the challenges we face and our failures.
- How Plan A will need to adapt
  Plan A 2025 must set a consistent direction of travel – towards becoming a truly sustainable retailer, for example – but will also need to evolve in response to a changing world.
- The role of responsible businesses
  Responsible companies should develop social and environmental targets that support the overall aims of the UN Sustainable Development Goals.

WHAT’S DIFFERENT ABOUT PLAN A 2025?

The aims of Plan A 2025 are to:

- Be the world’s leading retailer on engaging and supporting customers in sustainable living
  Our customers want us to help them live more sustainably and we’ve made good progress over the past 10 years. However, there is much more we can do and Plan A 2025 will see us fully integrate sustainability into our brand and deliver a step change in the way we engage and support our customers.
- Help 10 million people live happier and healthier lives
  We will extend the work we’ve done on our food products to our clothing, home and beauty offers too. We will have a particular focus on addressing issues of mental wellbeing, ensuring people are connected and happy as well as physically healthy. We will also work hard to ensure we support our customers and colleagues with cancer, heart disease, dementia and mental health issues.
- Help transform 1,000 communities
  We have a long tradition of our stores, offices and warehouses supporting their neighbouring communities. In Plan A 2025, we are going to bring together these many individual activities to ensure that our stores are able to help play a transformative role in the communities we serve, many of which face enormous challenges.
- Be a leader on transparency
  Over the past two years, we have published digital transparency maps identifying all the factories that produce food, clothing, home and beauty products for us. With Plan A 2025, we’ll add information on the raw material sources we use and also translate this into ‘on product’ information to help guide our customers’ decision making.
- Achieve a science-based target to accelerate our shift to a low carbon business
  The new plan includes a bold new (approved) science-based target to further improve the efficiency of our own operations as well as cutting 13.3m tonnes of CO2e from our wider value chain. We will also continue to invest in carbon offsets for our own operations in order to remain carbon neutral.
- Champion human rights by taking a lead on addressing in-work poverty, modern day slavery and an inclusive society
  Plan A 2025 sees a decisive step change on social issues. We have worked hard to manage ethical compliance over the last decade, but now we’re setting more aspirational goals to respect and positively impact individual human rights in all that we do.
- Ensure 100% of our products address 100% of their material social and environmental impacts
  We have an existing commitment that every one of the 3 billion food, clothing, home and beauty products we sell every year has at least one Plan A attribute by 2020. An attribute being, for example, Fairtrade certified tea or coffee or FSC certified timber in furniture. We believe it’s vital that Plan A should apply to everything we sell and not be a niche ‘ethical range’ in the corner of a store.
- Ensure 100% of factories are on a sustainability ladder with 50% of our products coming from our highest Gold Standard
  Currently, every factory that supplies M&S food is on a Bronze/Silver/Gold sustainability ladder to drive measurable improvements in its social and environmental performance. We are now making the same commitment for factories producing our clothing, home and beauty products as well as factories and suppliers to our Property Division.

By 2025, every factory producing products for us will be systemically improving its environmental and ethical performance.

Ensure our 50 key raw materials (80% by volume of what we use) come from a sustainable source

Many of the raw materials we use today come from more sustainable sources. With Plan A 2025, we are extending our commitment to a much greater range of the raw materials we use. We are setting a goal that 100% of the key raw materials we sell will come from sources respecting people, communities, planet and animal welfare.

BE A CIRCULAR BUSINESS GENERATING ZERO WASTE

Since 2012, we have been zero waste to landfill across our own operations in the UK and Republic of Ireland. Plan A 2025 sets a bold new goal to be a zero-waste business across all that we do – our operations, our supply chains and of course when our customers come to remove packaging and use our products. This includes designing our products and packaging to underpin the creation of a circular economy in the markets we serve.
LOOKING BACK OVER THE FIRST YEAR OF PLAN A 2025

Key highlights

In June 2017, we celebrated 10 years of Plan A under the banner of Making Every Moment Special in the Community. Thousands of M&S colleagues across the UK and ROI volunteered to help hundreds of community projects. Throughout the year our stores raised over £1m for local charities of the year, we distributed over a million meals to local organisations near our stores, and 130,000 customers voted for 25 community energy schemes to receive funding from M&S Energy.

In August, our Clothing & Home colleagues launched a range of Sustainable selvedge denim jeans. Like much of our cotton, these jeans support the Better Cotton Initiative but also score 21 using the Jeanologia Environmental Impact Measurement, which classifies low impact as being anything under a score of 33. These are probably the most sustainable items of clothing that M&S has ever sold.

In September, we announced that M&S is the first major food retailer to have all its milk producing dairy farms assured by the RSPCA for animal welfare. Milk was the first of our raw materials to feature on our interactive supplier map.

The theme of Plan A 2025 is transformation and a number of specific commitments are disproportionately important for us in understanding how we achieve greater scale and impact.

To engage our customers we’re putting Plan A at the heart of our Food and Clothing & Home brand strategies for the next three years, while also testing many different approaches to local engagement and the use of digital tools to connect with customers.

We’re making good progress with our community transformation programme. Having listened closely to the needs of the 10 pilot communities, we now have detailed action plans and a measurement system in place focused on the areas of education & employability and social wellbeing. We are also playing an active role with the Business in the Community Place leadership team. This activity is shaping the way we’ll deliver a number of our other people and communities commitments – on inclusion, wellbeing, employability and volunteering. For our commitments on sustainable sourcing, we’ve been working with others and are encouraged to see that more than 60 companies have joined us by signing up to the statement of support for the Cerrado Manifesto, calling for sustainable soy production.

Action on plastic

In April 2018, we became a founding member of the UK Plastics Pact to ‘transform the UK plastic packaging sector’ and in addition to our Plan A 2025 commitments we announced plans to replace 75 million items of plastic cutlery and 2 million plastic straws and remove plastic from 450 million tea bags.

Plan A 2025 progress so far

Since we launched Plan A 2025 in June 2017, we’ve made steady progress, but clearly, an eight-year transformation plan for a business of our scale and complexity was never going to deliver immediate results. Out of our 100 commitments, we’ve achieved two (on International Marks & Start and Franchise Reward Forums) and 48 are satisfactorily On plan. Thirty-seven are shown as Not started because they don’t yet have a defined delivery plan, but in many cases the groundwork is underway. Thirteen commitments are reported as Behind plan. Some of these, such as UK & ROI energy efficiency and Clothing & Home fleet efficiency, are being affected by the way our business is growing. More energy intensive food footage is disguising progress on energy efficiency and the shift to online sales is slowing Clothing & Home fleet efficiency figures. Others that are Behind plan are dependent on us finding innovative, cost-effective ways to implement them. Overall, we’re where we planned to be at this stage, but have a lot more work to do over the next 12 months.

Governance

Plan A 2025 was co-created by colleagues and leaders from across M&S, who collectively signed up to our ambitious targets. In addition, we identified the need to simplify and strengthen Plan A governance, taking into account the impact of our business-wide transformative plan and new leaders joining the business.

We invested time in anchoring the foundations of Plan A 2025, to ensure clear accountability and responsibility for every commitment – only then did we proceed to the delivery phase.

In 2017, we launched a new internal Governance process for Plan A, which centres on a single Plan A Committee in place of the previous two-tier approach. This new Committee reports into the overall Operating Committee (see page 39 for further details). Throughout the year, we’ve worked closely with our Governance and Internal Audit colleagues to improve our governance process, including the sign-off procedures for this report.

The year ahead for Plan A

The first stage of restoring the basics will be delivered by the time we report next year. These include key actions to inform our customers about Plan A product attributes and on rewarding choices of healthier food.

We’ll also be within touching distance of achieving our longer-running commitments on Product Plan A attributes, energy efficiency, food waste and zero deforestation, which are all due for completion in 2020.

Finally, we’ll need to stay alert to new and developing issues and to track how changes in the wider retail marketplace impact on our plans.

MIKE BARRY SUSTAINABLE BUSINESS DIRECTOR
In November 2017, we launched a new plan to accelerate the transformation of our business with the aim of making M&S special again through sustainable, profitable growth that delivers value for customers, colleagues, shareholders, communities and planet alike.

We have always recognised that our sustainability activities have to be central to how we do business. We have to make sure that Plan A 2025 is aligned with our Business Transformation Plan. We are in the process of ensuring that Plan A is aligned with this new corporate strategy.

**CUSTOMERS**
- Bringing Plan A product attributes to life
  Showcasing the M&S difference of how we source our products.
- A bigger role for Plan A in communication
  Both in how we market our brands and drive innovation to meet the needs of our customers.
- Building trust
  Reducing risks through robust governance, systems, compliance and partnerships.

**COLLEAGUES**
- Using Plan A for even greater engagement
  To build our relationships with the communities around us and contribute to the development of an inclusive business able to attract the best talent.

**EFFICIENCY**
- Driving down costs by cutting waste
  Through focusing on energy and food waste.
- Reducing risks and increasing productivity
  By working with suppliers to address the challenges of plastic waste, packaging and climate change.

---

**TRANSFORMATION TIMEFRAME**

**STARTING AFRESH**

Over the next 12-18 months we want to build on the legacy of over 10 years of Plan A progress. We need our colleagues to be fully involved in developing and promoting the business. And we need to find ways for our operations and supply chains to become even more efficient.

---

**STEP ONE**

**RESTORING THE BASICS**

- Bringing Plan A product attributes to life
  Showcasing the M&S difference of how we source our products.
- A bigger role for Plan A in communication
  Both in how we market our brands and drive innovation to meet the needs of our customers.
- Building trust
  Reducing risks through robust governance, systems, compliance and partnerships.
HELPING TO MAKE M&S SPECIAL AGAIN CONTINUED

STEP TWO
SHAPING THE FUTURE
These are actions which we’re already piloting and testing today, ready to roll out in 2-3 years’ time.
Together, they will represent the next step to a more digital, technology-enabled business that reflects and values customers’ lifestyles.
This will be a phase where we take newly founded innovations, efficiencies and loyalties to create a business for the future.

CUSTOMERS
- Plan A attracts new customers
  By providing evidence of a contemporary and ethical brand, appealing to a wide range of new and existing customers.
- Transparency
  Demonstration of our ethical and environmental standards in action, visible to all.

COLLEAGUES
- An engaged, skilled and inclusive workforce
  Scaling-up our activities on transforming communities and meeting new benchmarks of equality in the workplace.

EFFICIENCY
- Leaner supply chains and franchises
  Supplier Sustainability Scorecards being extended to all supply chains and efficiency benchmarks to key franchises.
- Sustainably designed products
  Designed to give the best customer experience and with the least social and environmental impact.

STEP THREE
MAKING M&S SPECIAL
By 2022, our Plan A 2025 commitments will be a platform of excellence, providing an M&S difference to all our products and services.
This will inspire the development of new products and services.
As well as addressing today’s risks, we want to evolve an approach which automatically responds to any new emerging social and environmental challenges.

CUSTOMERS
- Plan A allows us to move into new markets
  New products and services meeting the social and environmental needs of our customers.
- Engagement
  Engaged customers, clear about the steps they can take to make a positive difference.

COLLEAGUES
- An employer of choice
  Regarded for our values, skills and innovation.

EFFICIENCY
- Zero waste, carbon neutral supply chains
  Suppliers and business partners adopt M&S’s zero waste, carbon neutral culture.
- Sustainable products
  Products that exceed customers’ expectations while also creating a fairer and sustainable world.
The M&S difference is a way of doing business that creates value for us and our investors, and across all the resources and relationships on which we depend.

We aim to create long-term value through the effective management of resources and relationships. We manage these in line with our core values of inspiration, innovation, integrity and being in touch.

These values run through everything we do – they help us make the M&S difference of making M&S special through the products and services we offer our customers in the UK and internationally.

FOCUS ON: HUMAN RIGHTS

OUR COMMITMENT TO HUMAN RIGHTS

HOW IMPORTANT (SALIENT) HUMAN RIGHTS ISSUES CONNECT TO OUR ACTIVITIES

OUR APPROACH
At M&S, we have a long history of respecting human rights in the UK and standing up for those values internationally. Our commitment to human rights is reinforced in our Human Rights Policy and Code of Ethics and Behaviours and for all suppliers and business partners in our Global Sourcing Principles. We strive to be a fair partner by paying a fair price to suppliers, supporting local communities and ensuring good working conditions for everyone working in our business and supply chains. We are committed to building our employees’ and suppliers’ knowledge and awareness on human rights, encouraging them to speak up about any concerns without fear of retribution.

GOVERNANCE
Central to our approach is a robust governance structure. Directors of each business area, supported by a business area Human Rights practitioner, are responsible for ensuring effective human rights and modern slavery risk assessment and due diligence activity. Our Human Rights Practitioner Committee reports to a Human Rights and Modern Slavery Steering Group, which is also informed by our independent Human Rights Advisory Stakeholder Group.

To strengthen our governance, Oxfam is helping us to assess the impact of our sourcing practices on human rights in our UK food supply base and footwear supply chains in India. We have also relaunched our grievance reporting process with plans to improve how reports are managed and followed-up.

EMBEDDING HUMAN RIGHTS INTO HOW WE DO BUSINESS
In 2016 and 2017, we published two separate human rights reports which described our approach in detail and explained how it connected to our seven salient issues and to a further four on which we’ve adopted a watching-brief. We illustrated this relationship with the diagram you can see on the left-hand side of this page.

This report provides an update on our progress against the human rights targets published in the 2017 Human Rights report and our Plan A 2025 update.

RAISING AWARENESS – FLAGSHIP INTERNATIONAL HUMAN RIGHTS CONFERENCE
In January 2018, we held our first international Forced Labour and Human Rights conference in Delhi, with 250 attendees from our sourcing offices, franchise partners, suppliers, business partners and Indian retail joint venture. This event set out to help attendees understand and manage modern slavery risks in their operations and wider supply chains. External speakers included Coca-Cola, BT, Unseen and representatives from the Indian, UK and Australian governments. At the event we also launched a new International Forced Labour Toolkit for Suppliers and Partners, which we are keen to develop with stakeholder feedback.

For more information on UN Human Rights Salient issues, see: ungsreporting.org/resources/salient-human-rights-issues/
TAKING THE LEAD ON MODERN SLAVERY
Our 2018 Modern Slavery Statement highlights the ways in which we’ve made improvements. These cover policies, risk assessment, due diligence and collaborative action on understanding the prevalence of recruitment fees, increasing demand for responsible recruitment, identifying responsible recruiters and ensuring the voices of victims are heard and the intelligence learnt and acted upon.

TACKLING IN-WORK POVERTY
This year, we held an in-work poverty roundtable to define it and understand the likelihood of where it occurs. Financial awareness and support were identified as key interventions that M&S could make. As a result, we are launching a microsite to make. As a result, we are launching a microsite to identify financial literacy training and our regional team has introduced some detailed wage investigations. Through the Ethical Trading Initiative Bangladesh Social Dialogue programme, we are supporting the development of better workplace industrial relations by training both management and workers’ representatives to communicate more effectively. In our food supply chain, we participate in the Malawi 2020 Tea Coalition which is reducing the gap between actual earnings and a living wage for smallholder growers by improving productivity and quality. Around a fifth of these smallholder growers have benefited and 65% of them are women.

In our UK logistics supply chains, we’ve identified significant human rights risks associated with courier drivers. Over the last 12 months we’ve worked with DPD, our largest partner and will be sharing this learning with other courier service providers.

FOSTERING AN INCLUSIVE SOCIETY
Our aim is to create a culture of inclusion across M&S so that people from all backgrounds can join the workforce, reach their potential and feel valued for being themselves. We want to encourage suppliers and business partners to do the same. Consistent research shows that diverse businesses perform better – through innovation, better decision making, and attracting and keeping great people. Consequently, they’re likely to be more financially successful, to increase market share and capture new markets.

M&S has a long-established track-record for diversity and inclusion and we’ve been recognised in the Times Top 50 Employers for women for the last eight years. We first introduced our Board Diversity Policy in 2012 which includes a commitment to at least 30% female representation. We run four employee-led networks on gender, ethnicity (BAME), sexual orientation (LGBT) and health conditions. This year, we also held our second Diversity and Inclusion festival, engaging thousands of colleagues across M&S. In February 2018, we published our gender pay gap (see page 21) which is lower than both the UK and retail industry average. This is positive but the issues at play are complicated and we’ve committed to closing key gaps over the next few years. Gender programmes in our supply chains have also been continued. These include: Emerging leaders which encourages both women and men to become confident leaders; and programmes with the Indian British High Commission, Change Alliance and Business for Social Responsibilities HerProject, which are addressing sexual harassment. We have also formed a new partnership with Work Opportunities for Women (WOW) and the UK government’s Department for International Development to map where women workers are located and support their development.

DECENT WORK
All our human rights work is underpinned by our continued commitment to decent work, ensuring good working conditions for everyone working in our business and supply chains. We use many sources of data to inform our human rights approach, including the ethical audit results shared on the Sedex database (see page 23). We are currently reviewing the ethical assessment methodology to make it more sensitive to human rights issues. We aim to share our findings in next year’s report. We know that there is a greater need for transparency when human rights stakeholders and campaigners raise concerns about issues in our supply chain, both in terms of being open about the issue raised and making public the details of our response and resolution. As of last year, our Plan A website summarises the key third-party challenges we’ve received since 2014.

SECURING SAFE AND DECENT WORK IN BANGLADESH
Bangladesh is a key sourcing country for M&S Clothing & Home products and we are committed to ensuring the safety of workers in our supply chain there. We were early signatories to the 2013 Bangladesh Accord which has made significant improvements in building safety and fundamentally changed the mindset of the Bangladesh factory owners and the Employers’ Associations. It has also been successful in promoting women as training case handlers and providing a leading example of a strong, effective grievance system. By November 2017, 90% of original issues had been remediated, 82% of original and new issues were remediated and our individual progress was 93%. We’ve re-signed the Bangladesh Transition Accord to ensure a timely smooth handover of the responsibility of the Accord to a national regularity authority after May 2018.

Total commitments 89
We believe that taking care of ourselves is the first step to helping the people around us. As a society, we need to re-balance our diet to eat more healthy food. It’s not only obesity that’s a challenge but what comes with it in terms of increased heart disease and type 2 diabetes.

**TARGET FOR HEALTHIER FOOD SALES BY 2022**

50%

**TARGET FOR DONATIONS TO WELLBEING CAUSES BY 2025**

£25m

OUR GOAL

IS TO HELP 10 MILLION PEOPLE LIVE HAPPIER, HEALTHIER LIVES

**HEADLINE TARGETS**

– By 2019, we’ll incentivise and reward our customers for making healthier choices.

– By 2022, 50% of our global Food sales will come from healthier products.

– By December 2018, M&S single serve portion sizes of snacks, confectionery and ice cream will contain no more than 250 calories.

– Between 2017 and 2025, we’ll help to make a positive difference to people who are affected by either cancer, heart disease, mental health, loneliness or dementia by helping to raise £25m for charities that support these causes.

– By 2022, we’ll enable our M&S colleagues worldwide to complete a health risk assessment, including health checks, where appropriate. We’ll use this data to tailor our interventions/advice and report annually on progress.

# Pillar 1: Wellbeing continued

## Healthy Food Products

### Improved Indulgent Food**

**Aim**
By 2019, our indulgent M&S Food categories will have 20% fewer calories, saturated fat and total* sugar in total compared to 2017.

**Progress**
As of March 2018, we have reduced total calories by 4%, saturated fat by 7% and total sugar by 5% across the top 10 indulgent categories that contribute most to UK diets. This is based on a progressive measurement rolled-up from October 2016.

Examples of areas where we have achieved calorie reductions include a 13% reduction in single ice creams and a 12% reduction across our most popular café cakes.

However, we’re still in the process of developing our plans to reach these ambitious 20% reduction targets by 31 March 2019.

### Destination of Choice (Food)

**Aim**
By 2020, we’ll rationalise our number of health brands and simplify our on-pack messages in order to maintain M&S Food being the destination of choice for healthy food for our customers as shown by the overall results from nutritional benchmarking, number of healthy products within a category and market trends analysis.

**Progress**
This year, we’ve simplified our health brands and health offering by bringing them all together under the Eat Well sunflower logo. Our ‘Count on Us’ and ‘Balanced For You’ ranges focus on calorie management; other on-pack labelling highlights specific diet choices, such as vegetarian, vegan, gluten-free, vitamin D and no added sugar. As a result, we have removed other M&S health brands, such as Active Health and Guilt-Free Snacking.

We continue to benchmark the nutritional content and health qualities of M&S food and drinks and use this information each time we review a product’s recipe.

82% of M&S Food meets the Department of Health’s 2017 salt targets and we have improved the nutritional content of benchmarked lines by increasing Eat Well choices and five-a-day content as well as offering vegetarian, vegan and gluten-free options.

We are still developing our plan to define and measure Destination of Choice.

### Vegetarian Options

**Aim**
By 2020, we’ll have grown a comprehensive range of vegetable-based protein convenient meal solutions and components for cooking.

**Progress**
As of April 2018, we have launched a new range of vegetable-based protein alternatives, including soya mince, soya chunks, marinated tofu and a tofu-based salad – none of which were available in our baseline year of 2016.

We have also relaunched our vegetarian range with 12 plant-based meat alternative dishes. We are still working with our suppliers and chefs to expand choice.

### 50% Healthier Food**

**Aim**
By 2022, 50% of our global Food sales will come from healthier products.

**Progress**
As of April 2018, 43% of M&S Food sales came from healthier products. This percentage excludes non-M&S brands, wine and hospitality lines, but includes any healthy or healthier food and drink product, such as those labelled as Eat Well.

### Calorie-Cap Single Portion Food**

**Aim**
By December 2018, M&S single serve portion sizes of snacks, confectionery and ice cream will contain no more than 250 calories.

**Progress**
As of April 2018, 75% of our single serve portions of snacks, confectionery and ice cream contain no more than 250 calories. We have launched 15 new portion-controlled biscuits, cereal bar and chocolate lines, all with less than 250 calories, and made all our single choc-icles, ice cream cones and bars less than 250 calories.

**Assured by DNV GL**
CLOTHING & HOME PRODUCTS

CLOTHING HEALTH ATTRIBUTES

**Aim**
By 2025, 20% of all M&S clothing will have a special Plan A health or wellbeing attribute (e.g., SkinKind™ accessories and specialist/adapted clothing).

**Progress**
We already have a small number of special Plan A health or wellbeing attributes.
As of April 2018, 8% of the volume of M&S clothing items sold worldwide had one of these attributes.

PERCENTAGE OF CLOTHING WITH PLAN A ATTRIBUTE BY 2025

20%

WELLBEING ADVICE TO CUSTOMERS

**Aim**
By 2020, we will extend our health and wellbeing advice to our customers to help them live happier, healthier lives.

**Progress**
This year, we've published more wellbeing advice for customers online, including blogs about alcohol consumption, the impact of processed foods, healthy food trends, and plant-based diet options.
We've also conducted small trials of face-to-face Health MOT interviews in stores.

See more https://corporate.marksandspencer.com/blog

FRANCHISE CONFECTIONERY TILLPOINTS

**Aim**
By 2021, we will work with our franchise partners to remove confectionery from tillpoints in all key franchise partner operated M&S stores worldwide (excluding petrol station forecourts).

HOW WE SELL

REWARDING CUSTOMERS (HEALTH)**

**Aim**
By 2019, we'll incentivise and reward our customers for making healthier choices.

**Progress**
This year, we've developed a programme of future in-store and Sparks card activities to help people make healthier choices.

£25M FOR HEALTH CAUSES**

**Aim**
Between 2017 and 2025, we'll help to make a positive difference to people who are affected by either cancer, heart disease, mental health, loneliness or dementia by helping to raise £25m for charities that support these causes.

**Progress**
This year, we've supported a number of charities who address cancer, heart disease, mental health, loneliness or dementia, raising £7.4m towards our £25m target.

Fundraising activities included Breast Cancer Awareness Month, Fashion Targets Breast Cancer for Breast Cancer Now, Sparks Card donations and Charity Christmas cards.
For the eighth year running, M&S Cafés, Food Halls, and Simply Foods stores participated in Macmillan Cancer Support’s World’s Biggest Coffee Morning, which together with activities throughout the year, raised £3.5m. This total included over £1.5m raised by our colleagues and Macmillan volunteers in our stores (last year £1.2m).

ANNUAL FUNDRAISING FOR MACMILLAN CANCER SUPPORT

£3.5m

PILLAR 1: WELLBEING CONTINUED

COLLEAGUE WELLBEING FRAMEWORK

Aim
By 2019, we’ll launch an independently benchmarked retail industry leading health and wellbeing framework, providing support to M&S colleagues worldwide on physical and mental health as well as nutrition and wellbeing.

Progress
Since we launched this commitment, further research has shown that robust, independent benchmarks for retail industry wellbeing frameworks are not readily available. These could be established, but we believe it’s more important to focus our efforts on improving wellbeing outcomes for our colleagues. To reflect this change of emphasis and allow time for delivery, we’ve updated the wording of this commitment to read:

By 2020, we’ll launch an improved health and wellbeing framework, providing support to M&S colleagues worldwide on physical and mental health as well as social wellbeing.

COLLEAGUE HEALTH ASSESSMENT**

Aim
By 2022, we’ll enable our M&S colleagues worldwide to complete a health risk assessment, including health checks, where appropriate. We’ll use this data to tailor our interventions/advice and report annually on progress.

WELLBEING IN EMPLOYABILITY

Aim
By 2022, health and wellbeing learning and support will be included in all our employability programmes worldwide.

MENTAL HEALTH TRAINING

Aim
By 2022, we’ll offer training on mental health to M&S colleagues in our offices, stores and warehouses worldwide.

HEALTH & SAFETY DATA**

Aim
We will continue to report on our UK and ROI health and safety data and extend to owned international operations from 2020.

Progress
In addition to UK and ROI data below, internal reporting is also taking place for our International operations in Greece, Czech Republic and joint venture in India, but is currently only available in a different format.

SUPPLY CHAIN WELLBEING

(ITAL IS A SALIENT HUMAN RIGHTS ISSUE)

FRANCHISE/SUPPLIER WELLBEING

Aim
By 2019, we’ll define our expectations on nutrition and physical and mental wellbeing for our franchise partners and direct suppliers and by 2022 launch a range of initiatives, including health checks where appropriate, to enable them to tailor their interventions and advice. We’ll report annually on progress.
We believe we can achieve more together than we can on our own. Throughout our 134 year history, we’ve supported our local communities. We know that working with our customers to support vibrant communities is essential for our own future success.

**OUR GOAL**

**IS TO HELP TRANSFORM 1,000 COMMUNITIES**

**HEADLINE TARGETS**

- By 2020, in 10 locations we will have completed programmes that aim to secure meaningful economic, social and environmental benefits in the communities around our stores and beyond. We’ll build on our insights and roll out programmes in 100 further locations in the UK and internationally by 2023, then share our learnings with 1,000 locations by 2025.

- By 2025, 50% of our full line M&S operated stores and offices in the UK will have space available for community groups, charities and local interest groups to use.

- Between 2017 and 2025, we’ll support M&S colleagues worldwide to provide one million hours of work-time community volunteering.

- By 2025, we want all edible surplus food from M&S stores, key franchises and direct M&S Food suppliers worldwide to be diverted for human consumption.

**IN THIS SECTION**

- Connecting with communities 17
- Skills and employment 18
- Inclusive business 19
- Human rights 21
PILLAR 2: COMMUNITY CONTINUED

CONNECTING WITH COMMUNITIES

ALL FOOD EATEN BY PEOPLE**

Aim
By 2025, we want all edible surplus food from M&S stores, key franchises and direct M&S Food suppliers worldwide to be diverted for human consumption.

Progress
See the Food waste (reduction) commitment on page 31 for progress at UK M&S stores.

EDUCATION PARTNERSHIP

Aim
By 2020, we’ll launch an education programme in the UK in partnership with others to promote the importance of wellbeing, employability and sustainability in schools and colleges.

Progress
Having commissioned research, in 2018/19 we plan to develop content focused on selected aspects of health and wellbeing, employability and sustainability. This content will then be trialled in schools connected to our ‘Helping transform communities’ commitment. If successful we intend to make this content available to other schools and colleges in 2019/20.

SUPPORTING LOCAL FUNDRAISING

Aim
Between 2017 and 2025, we aim for M&S operated and key franchise stores worldwide to make a positive difference to their local community by supporting local charities through fundraising, volunteering and product donations.

Progress
This year, 502 of our stores in the UK and ROI have adopted a charity of the year and helped to raise over £1m for local and national charities working in the local community. In addition, 514 stores have donated surplus food to local charities as well as contributing most of the 30,534 hours of work-time volunteering.

M&S stores in our joint venture in India also raised in excess of £40,000 supporting two main charities of CRY (Child Rights & You) and OGAAN Cancer Foundation.

RAISED FOR CHARITY IN THE UK AND ROI

£1.2m

HELPING TRANSFORM COMMUNITIES**

Aim
By 2020, in 10 locations we will have completed programmes that aim to secure meaningful economic, social and environmental benefits in the communities around our stores and beyond. We’ll build on our insights and roll out programmes in 100 further locations in the UK and internationally by 2023, then share our learnings with 1,000 locations by 2025.

Progress
This year, we’ve met representatives from communities to find out what they want us to achieve in their local area. There have been differences from one area to another, but it is clear that ‘education and employability’ and ‘social wellbeing’ should be our two priorities. We’re now planning a series of trials to test different approaches.

“*The kids are bored and they fight for something to do. They need something else to focus on.*

CONNECTING WITH COMMUNITIES CONTINUED

TOWN CENTRE REGENERATION

Aim
By 2019, 200 of our retail managers will have taken a lead role in collaborations which aim to revitalise and secure lasting social benefits in city and town centre locations.

Progress
Building on the Business in the Community backed ‘Healthy High Streets’ programme, this year, 58 of our retail managers have played a hands-on, lead role, in collaborations to improve town and city centres. These include a wide range of activities to support the development of Business Improvement Districts (BIDs) across the UK.

COMMUNITY DONATIONS**

Aim
We will report annually on our community donations and amounts raised with support from customers and suppliers.

Leveraged (additional funds raised from other sources as a result of M&S activity) 7.9 £m

* Carrier bag proceeds for 2017/18 have moved to leveraged in line with new London Benchmarking Group guidance and include funds used to support key M&S community activities.

COMMUNITY ENTREPRENEUR AWARD

Aim
By 2019, we’ll launch an annual Community Business Competition to support and recognise local community entrepreneurs who bring positive benefits to society. We’ll report annually on progress.

FOOD ARTISAN STRATEGY

Aim
By 2019, we’ll launch a strategy to support growing artisan and smallholder producers in the M&S Food supply chain.

SOCIAL DIVIDEND

Aim
By 2019, we’ll develop an approach for calculating and accounting for the financial and non-financial support enabled by M&S and the associated benefits to society. We’ll then measure and report on our performance on an annual basis.

M&S ENERGY

Aim
By 2025, M&S Energy will help at least 200 communities to reduce their carbon footprint through the installation of renewable energy generation or energy efficiency measures, including battery storage.

Progress
In 2017/18, the M&S Energy Community Energy Fund supported low-carbon energy installations in 26 communities across the UK. Over 130,000 people voted for their favourite projects including two competing schemes in Greater Manchester, each registering over 6,000 votes.

The winners included a range of projects to install solar pv panels and LED lighting, as well as a new asphalt surface made using waste plastic. In total, projected greenhouse gas emission savings are around 222 tonnes a year.

** Assured by DNV GL
SKILLS AND EMPLOYMENT CONTINUED

INTERNATIONAL MARKS & START

Aim
By 2019, we aim to have an employability programme in all countries where we have M&S operated stores and will report on our progress of launching programmes in countries where we have franchised stores.

Progress
As of 31 March 2018, we have employability programmes available in the UK and ROI, Greece, Czech Republic and our joint-venture in India.

In addition, we’ve also supported a similar scheme with our franchise partners in Hong Kong.

INCLUSIVE BUSINESS (ALSO A SALIENT HUMAN RIGHTS ISSUE)

RETAIL ACCESSIBILITY BENCHMARK

Aim
By 2022, we’ll undertake regular benchmarking to ensure we have the most accessible and inclusive retail proposition in store and online. We’ll aim to extend this approach to our international locations from 2023.

Progress
We’ve developed a project plan and are currently scoping research into consumer expectations about accessibility and inclusion, and into how these can be benchmarked.

While working on this new programme, we’ve maintained our commitment to the DisabledGo disability store access checker.

INCLUSIVE DESIGN STANDARDS

Aim
Between 2020 and 2025, we’ll implement new Inclusive Design Standards to ensure M&S Food and Clothing & Home products and packaging are accessible to and usable by as many people as possible. These new Inclusive Design Standards will be created by a detailed review to be published in 2019.

INCLUSION STRATEGY

Aim
By 2019, we’ll launch an independently endorsed retail industry leading inclusion strategy that is locally relevant for our business, franchise partners and supply chain.

Progress
We’re creating an internal diversity and inclusion group to help shape a new M&S Inclusion Strategy. The group will include representatives from across M&S and independent specialists will also be invited to make contributions to its work.

The group will focus on addressing local needs across our business.

** Assured by DNV GL

MARKS & START

Aim
Between 2017 and 2025, we aim to offer 25,000 Marks & Start work placements worldwide to people from disadvantaged parts of the community, with 50% going into work and 50% of these retaining work for at least 12 months.

INCLUSIVE BUSINESS (ALSO A SALIENT HUMAN RIGHTS ISSUE)

Aim

By 2025, we want M&S workforces to reflect the diversity of each region in which we operate. We'll report on progress from 2019.

Progress

This year, we were again recognised in the Times Top 50 Employers for Women (eight years running). We run four employee-led networks on gender, ethnicity (BAME), sexual orientation (LGBT) and health conditions. This year, we also held our second Diversity and Inclusion festival, engaging thousands of colleagues across M&S.

All data as of March 2018.

SENIOR MANAGEMENT DIVERSITY

Aim

By 2022, we aim to have 50% female and at least 15% BAME (Black, Asian, and Minority Ethnic) representation on the M&S senior management team.

Progress

As of 31 March 2018, 42% of senior management are women.

As we're still developing our plans this commitment is Behind plan.

GENDER EQUALITY PROGRAMME

Aim

By 2019, we'll help advance women's human rights and combat gender discrimination by launching programmes and initiatives that promote gender equality and women's empowerment in our business and supply chains.

Progress

Our new Inclusion Strategy will address gender equality (see our commitment on Inclusion Strategy). We also supported supply chain programmes including the Business for Social Responsibility HerProject which benefited over 18,000 women last year and the Emerging Leaders programme.

While these programmes will continue at the same level in 2018/19, no further initiatives are planned to be launched, making us Behind plan.

COLLEAGUE SOCIAL MOBILITY

Aim

By 2020, we'll measure the socio-economic and educational background of our global M&S employee base and establish a target to improve our social mobility by 2025.

Progress

As of 31 March 2018, 42% of senior management are women.

As we're still developing our plans this commitment is Behind plan.
INCLUSIVE BUSINESS (ALSO A SALIENT HUMAN RIGHTS ISSUE) CONTINUED

**COLLEAGUE GENDER PAY GAP**

**Aim**
We'll aim to reduce the non-demographic gender pay gap within M&S in the UK (this is the gap adjusted for different gender demographic by grade and the impact of disproportionately high female numbers in our retail operation) by at least 10% by 2020 and by 25% by 2025 compared to 2017.

**Progress**
The gender pay gap is the difference between the average hourly rates paid to men and women across the UK. In March 2018, we published our first gender gap data for our UK employees:

<table>
<thead>
<tr>
<th></th>
<th>2017 M&amp;S UK</th>
<th>Retail sector*</th>
<th>UK*</th>
</tr>
</thead>
<tbody>
<tr>
<td>Median (or mid-point) pay gap</td>
<td>3.3%</td>
<td>9.3%</td>
<td>18.4%</td>
</tr>
<tr>
<td>Mean (or average) pay gap</td>
<td>12.3%</td>
<td>16.4%</td>
<td>17.4%</td>
</tr>
<tr>
<td>Non-demographic (equal numbers of men and women at all levels) pay gap</td>
<td>1.5%</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

* Based on estimates from the Office for National Statistics.

Our gender pay gap is largely attributable to the fact that more of our customer assistants are women than men, while the reverse is true of our senior management roles.

**SUPPLIER GENDER DIVERSITY**

**Aim**
By 2022, we aim for our Food and Clothing & Home first-tier manufacturing sites to have 25% women in management positions.

HUMAN RIGHTS (GOVERNANCE AND MANAGING SALIENT ISSUES)

**OXFAM HUMAN RIGHTS PROGRAMME**

**Aim**
We’ll enter into a new collaboration with Oxfam over three years focusing on the UK and India to develop a deeper understanding of the connection between our sourcing practices and our human rights impacts. Oxfam will report the findings independently, while M&S will develop a programme of actions and report annually on our progress from 2018.

**Progress**
This collaboration will focus on our Food suppliers in the UK and Footwear suppliers in India. At the request of Oxfam, the timetable has been delayed for four months. This means that Oxfam’s final report has been re-scheduled for early 2020 and this may delay our own progress report.

**RAISING HUMAN RIGHTS CONCERNS**

**Aim**
By 2019, we’ll put in place mechanisms to make human rights complaints or raise concerns, which are accessible to all individuals and communities connected with our business. From 2020, we’ll report annually on the use and performance of these mechanisms.

**Progress**
We’ve re-launched our grievance reporting, which includes human rights, with plans to improve processes for logging human rights concerns, tracking how they’re handled, training our colleagues and giving better guidance to suppliers and business partners. This will allow us to start reporting publicly from 2020 but we’re currently behind where we’d planned to be.

---

**Assured by DNV GL**

Read more on human rights
FRANCHISE REWARD FORUMS

**Aim**
From 2018, we’ll run Reward Forums for key franchise and third-party operators to set out our approach to delivering higher rates of pay in the UK based around paying the living wage in a sustainable way.

**Progress**
This commitment forms part of our mandatory annual statement on modern slavery.

Read more on the Modern Slavery Act

SUPPLIER WORKER PAYMENTS

**Aim**
By 2020, all workers in our first-tier Food and Clothing & Home manufacturing sites will have the opportunity to be paid digitally.

SUPPLIER WORKER REPRESENTATION

**Aim**
By 2020, we’ll carry out and publish a review of the effectiveness of workers’ representation arrangements for enabling improved workers’ rights, within our Food and Clothing & Home first-tier manufacturing supply chain. We’ll develop a programme of actions and report annually on our progress.

SUPPLIER FEEDBACK

**Aim**
By 2019, we’ll develop and launch a mechanism that enables all M&S Food suppliers and raw material suppliers to report transparently on their experience of working with M&S and for M&S to report on steps taken to improve our score.

SUPPLIER ETHICAL AUDITS

**Aim**
By 2019, we’ll work with others to review and implement ethical assessment methodologies that drive better outcomes for workers in our supply base and report annually on our progress.

SUPPLIER ETHICAL AUDITS

**Aim**
We will further our work to eradicate modern slavery. By 2018, we will report annually on scaling-up responsible recruitment and better management of third-party labour providers as well as our progress towards ensuring no worker pays for a job.

**Progress**
This commitment forms part of our mandatory annual statement on modern slavery.

GLOBAL COMMUNITY PROGRAMME**

**Aim**
Between 2017 and 2025, our Global Community Programme will benefit one million people in our supply chain communities by working in partnership with others to help build livelihoods, protect the environment and improve wellbeing focusing on our areas of biggest human rights and environmental impact.

**Progress**
Last year, the programme operated in nine countries covering subjects such as health, finance, farming techniques and gender equality. While we believe that this plan can scale-up to meet our eventual target, we are not currently able to quantify the number of beneficiaries.

** Assured by DNV GL
M&S CLOTHING & HOME SUPPLIER ETHICAL AUDITS 2017/18**

All direct M&S Clothing & Home suppliers are required to undertake ethical audits at a frequency determined by risk.

** Figures lower than last year due to a transition to a longer audit window of 3 months.

HUMAN RIGHTS (GOVERNANCE AND MANAGING SALIENT ISSUES) CONTINUED
We believe that we should leave the planet better than we found it. We aim to offer our customers the great value, high quality products and services they expect from us while also caring for the environment on which we all depend.

**TARGET FOR THE PERCENTAGE OF M&S PRODUCTS TO HAVE A PLAN A ATTRIBUTE BY 2020**

100%

**OUR GOAL**

IS TO BECOME A ZERO-WASTE BUSINESS

**HEADLINE TARGETS**

- **By 2020**, 100% of M&S products will have at least one Plan A attribute and by 2025 every product will have attributes which address all priority social, ethical and environmental impacts.

- **By 2022**, all M&S product packaging in the UK that could end up with our customers will be not only ‘recyclable’, but ‘widely recycled’. To achieve this, we will actively collaborate with others to bring about changes in local government recycling policy. By 2022, we will also assess the feasibility of making all M&S plastic packaging from one polymer group, which will help maximise the use of recycled content.

- **By 2025**, the 50 key raw materials used for M&S products will come from sources verified as respecting the integrity of ecosystems, the welfare of animals and the wellbeing of people and communities. This will cover over 80% of M&S raw material usage by volume.

**IN THIS SECTION**

- Inspiring our customers
- M&S greenhouse gas emissions
- Energy consumption and sourcing
- Refrigeration
- Store climate adaptation
- Supply chain greenhouse gas emissions
- Zero waste in M&S operations
- Supply chain raw materials
- Suppliers
INSPIRING OUR CUSTOMERS

PRODUCT PLAN A ATTRIBUTES**

Aim
By 2020, 100% of M&S products will have at least one Plan A attribute and by 2025 every product will have attributes which address all priority social, ethical and environmental impacts.

Progress
As of April 2018, based on the volume of items sold worldwide, 83% of M&S products have at least one Plan A attribute (last year 79%). This includes 84% of M&S Food products (last year 81%) and 75% of M&S Clothing & Home products (last year 68%).

M&S PRODUCTS WITH AT LEAST ONE PLAN A ATTRIBUTE

83%

FOOD +3%

CLOTHING & HOME +7%

SUPPLY CHAIN TRANSPARENCY**

Aim
We’ll become even more transparent about how we operate. We aim to add further Food and Clothing & Home supply chain details by 2019 and details of raw materials suppliers by 2022. We’ll ensure all information can be easily viewed by our customers in-store or online worldwide by 2025.

Progress
This year, we launched new online content, including information about our Food Animal Welfare performance, data on our suppliers’ usage of antibiotics in agriculture, and the locations of M&S Milk Pool farms.

LABELLED SUSTAINABLE PRODUCTS

Aim
By 2019, we’ll develop and launch a mechanism enabling products that meet certain sustainability criteria to be clearly labelled, helping customers worldwide identify these products in-store or online.

Progress
We’ve developed a project to map our Plan A product attributes against the issues that are most important to our customers and the relevant ways of communicating them at the point of purchase.

REWARD CUSTOMERS (SUSTAINABILITY)

Aim
By 2022, we’ll incentivise and reward our customers for making more sustainable choices.

SUSTAINABLE DESIGN TOOLKIT

Aim
By 2019, we’ll develop and publish an independently endorsed, retail industry leading, sustainable product design toolkit for M&S Food and Clothing & Home products and subsequently report on its implementation.

RECYCLABLE PACKAGING**

Aim
By 2022, all M&S product packaging in the UK that could end up with our customers will be not only ‘recyclable’, but ‘widely recycled’. To achieve this, we will actively collaborate with others to bring about changes in local government recycling policy. By 2022, we will also assess the feasibility of making all M&S plastic packaging from one polymer group, which will help maximise the use of recycled content.

M&S food packaging

** Assured by DNV GL
CLOTHING REUSE AND RECYCLING**

** Assured by DNV GL

Aim
Between 2017 and 2025, we’ll help customers around the world give clothes a second life, by facilitating the collection of at least three million garments a year for reuse and recycling.

Progress
It’s now over 10 years since we launched our first clothing re-use and recycling scheme in January 2008.

In that time, we’ve helped our customers to donate over 30 million used garments. In 2017/18, our customers donated 3.1 million garments, mainly through our UK and ROI Shwoping partnership with Oxfam.

Men’s Shwop suit made from recycled materials

DONATED GARMENTS SINCE 2008

30m

CLOTHING & HOME RECYCLED MATERIALS

Aim
By 2025, at least 25% (by volume) of M&S Clothing & Home products will be made using at least 25% reused or recycled materials.

CLOTHING & HOME REPAIR SERVICES

Aim
By 2022, we’ll introduce a range of repair services for M&S Clothing & Home products.

FOOD WASTE (DIGITAL CAMPAIGN)

Aim
By 2019, we’ll develop a digital strategy and campaign to engage customers on the value of food.

Progress
We are developing digital content, including films, to highlight the care and attention that goes into producing a range of ingredients for M&S Food. We plan to make these available in the UK on various digital platforms. We will then assess how they influence customers’ opinions about the value of M&S Food.

FOOD WASTE (HOUSEHOLD TOP 10)

Aim
By 2022, we’ll introduce messaging and implement relevant design changes to our top 10 most wasted food products (as defined by WRAP) to help our customers prevent food waste in the home.

Progress
Working with WRAP (Waste Resources Action Programme) we’ve identified the top 10 most wasted food products that we sell. These include bread, potatoes, milk, drinks, poultry, meat and cakes. We’ve also held a workshop and started to identify actions we could take to help customers reduce food waste in their homes.

** Assured by DNV GL
### M&S GREENHOUSE GAS EMISSIONS

#### SCIENCE-BASED TARGET EMISSIONS**

**Aim**
By 2030, in line with climate science, we aim to reduce greenhouse gas emissions from M&S operations worldwide by 80% compared to 2006/07, en route to a 90% reduction by 2035.

#### CARBON NEUTRAL OPERATIONS**

**Aim**
We’ll maintain carbon neutrality for our worldwide operations up to at least 2025. We will develop a strategy to ensure that by 2022, participants of our supply chain can benefit from our carbon credit purchases.

**Progress**
To the best of our knowledge, we’re still the only major retailer in the world with carbon neutral global operations, achieved and maintained by using a combination of reductions, procuring renewable energy, and purchasing and retiring high quality carbon offsets. As a signatory to the United Nation’s Climate Neutral Now initiative, we procured 10% of the offsets retired for 2017/18, through the Clean Development Mechanism (CDM) process. For more information see: climateneutralnow.org.

In 2017/18, our location method emissions were 430,000 tonnes CO₂e, down by 33% on 2006/07 (640,000 tonnes CO₂e). Around 30,000 tonnes of the reduction achieved in 2017/18 was due to the further lowering of UK grid factors.

Our market method emissions were 157,000 tonnes CO₂e, down by 75% on 2006/07 (640,000 tonnes CO₂e), putting us in a strong position to achieve our science-based target reduction of 80% by 2030.

You can find full disclosure of M&S climate risks by registering as a user at cdp.net.

More detailed data by source covering several years can also be accessed here.

Emissions are shown in compliance with the WRI/WBCSD GHG Protocol Corporate Accounting and Reporting Standard Revised and have been calculated using revised carbon conversion factors published by BEIS in August 2017. For international electricity, 2017 IEA Scope 2 factors have been used. Additional refrigeration gases are drawn from Bitzer Report 19. This includes all activities where we have operational control. It excludes all non-metered premises and shopping service contract supplies. Renewable electricity tariffs have been calculated in accordance with the March 2015 WRI/WBCSD GHG Scope 2 Guidance on procured renewable energy. We have also added a conservatively estimated 2006/07 baseline for our International operations based on 2013/14 data. Scope 3 emissions shown in previous years are now included in our new Science-Based Target Footprint commitment.

**Assured by DNV GL**
UK AND ROI ENERGY EFFICIENCY**

** Aim **
By 2020, we aim to improve energy efficiency in M&S operated stores, offices and warehouses in the UK and ROI by 50% compared to 2006/07, rising to 60% by 2025.

** Progress **
This year, total energy efficiency across our stores, offices and warehouses was up 40%, to 34.4 KWhs/sq ft, compared with 2006/07 (57.4 KWhs/sq ft).

Store energy efficiency was +40% at 40.8 KWhs/sq ft, compared to 67.9 KWhs per sq ft in 2006/07. Gas usage included in our calculation has been adjusted using standard degree days to reflect changes in the number of cold days (43.9 KWhs/sq ft before adjustment).

This modest progress is due to a number of factors, including the opening of more energy intensive food footage which cancelled out some improvements.

We improved energy efficiency in our warehouses by 39% at 16.1 KWhs/sq ft compared with 2006/07. 26.4 KWhs/sq ft and we improved energy use in our offices by 11% at 43.8 KWhs/sq ft (2006/07: 49.4 KWhs/sq ft).

Our current performance is below the level required to achieve our 50% target by 2020.

** INTERNATIONAL ENERGY EFFICIENCY**

** Aim **
By 2020, we aim to improve energy efficiency in M&S operated international stores and warehouses outside of ROI by 30% compared to 2013/14.

** Progress **
Last year, we operated stores in 11 countries outside the UK and ROI, including a joint-venture business in India. Around a quarter of these international stores’ total footage uses energy provided by the landlord and is outside our operational control. We’ve only included the energy and footage over which we have operational control.

Throughout the year, we ran a store closure programme and all data is pro-rata. We now have continuing retail operations in the Czech Republic and Greece and a joint venture in India. In 2017/18, we reduced our energy consumption by 13%, achieving 24.3 KWhs/sq ft compared to 2013/14 (279 KWhs/sq ft). Energy consumption in our international stores is much lower than in those in the UK and ROI because most International stores don’t sell chilled food and use heating and air conditioning provided by the landlord.

We also have four international warehouses. These warehouses showed a 70% improvement in efficiency, due to changes in the way they use their footage.

** Integral Stores (Outside of ROI) **

PILLAR 3: PLANET CONTINUED

ENERGY CONSUMPTION AND SOURCING CONTINUED

RENEWABLE ELECTRICITY**

Aim Between 2017 and 2035, 100% of electricity purchased for M&S operated stores, offices and warehouses worldwide will be classified as renewable.

Progress This year, all the electricity purchased for M&S operated stores, offices and warehouses worldwide came from on-site generation, green tariff renewable sources, or was supported by renewable electricity certificates. A small amount of electricity (1,738 MWh), equivalent to 0.3% of our consumption, was generated on-site using diesel generators to assist relief of peak grid demand in the UK.

RENEWABLE PEAK-ENERGY MANAGEMENT

Aim By 2025, we’ll deliver 50% of our UK property estate peak-energy demand flexibly, using clean and renewable technologies.

CLEAN AND RENEWABLE TECHNOLOGIES BY 2025

50%

** Assured by DNV GL

Biomethane**

Aim By 2025, all gas procured for M&S operated stores, offices and warehouses in UK and ROI will be certified biomethane.

Progress In 2017/18, we purchased 133 CWhs of biomethane gas, equivalent to 57% of our annual usage (last year 27%). This reduced our market-method reported emissions by nearly 24,500 tonnes. However, as we still need to secure future contracts to ensure that we achieve this commitment, we are Behind plan.

Clothing & Home Fleet Fuel Efficiency**

Aim By 2025, we aim to improve fuel efficiency for M&S Clothing & Home deliveries to store in the UK and ROI by 40% by 2025 and 60% by 2030 compared to 2006/07.

Progress During the year, our Clothing & Home store delivery greenhouse gas emissions were 26.2 kg CO₂e per 1,000 singles delivered, compared to 29.4 kg CO₂e in 2006/07 and our 2025 target of 15.2 kg CO₂e. This is up 3% on 2006/07 and is due to the changing shape of our Clothing & Home business with an increasing volume of sales online. This is despite a range of actions to improve efficiency.

Food Fleet Fuel Efficiency**

Aim By 2025, we aim to improve fuel efficiency for M&S Food deliveries to store in the UK and ROI by 40% by 2025 and 60% by 2030 compared to 2006/07.

Progress During the year, our Food store delivery greenhouse gas emissions were down 46% at 3.6 kg CO₂e per store per month, compared to 6.7 kg CO₂e in 2006/07 and our 2025 target of 4.0 kg CO₂e. Although this exceeds our 2025 target we’re showing this commitment as On plan (rather than Achieved) because of potential changes that may impact this progress in the near future.

Refrigeration

Aim By 2025, we aim to reduce refrigeration gas carbon emissions by 80% in all M&S operated stores in the UK and ROI.

Progress This year, our emissions from UK and ROI refrigeration and air-conditioning were 54,000 tonnes CO₂e. Allowing for changes in store footage, emissions were down 67% at 3.1 tonnes CO₂e/1,000 sq ft (2006/07: 9.4 tonnes CO₂e/1,000 sq ft).

** Assured by DNV GL
### STORE REFRIGERATION (HFCs)**

**Aim**
By 2030, we aim to replace HFCs in refrigeration systems in all M&S operated stores in the UK and ROI.

**Progress**
69 M&S stores now have HFC-free sales floor refrigeration systems, our standard specification for all new-build stores. This represents a significant increase on last year's total of 37 stores. However, we have not devised a plan for our existing stores to be converted by 2030, making it Behind plan.

### STORE CLIMATE ADAPTATION

**Aim**
By 2025, we'll install building fabric solutions in 20 stores at high risk of climate-related weather events, to improve our resilience to climate risks.

**Progress**
We've identified the M&S stores in the UK which we believe are at the highest risk of climate-related weather events using our Climate Risk and Mitigation Tool, cross referenced with other relevant data. We've also developed a delivery programme but are not currently in a position to proceed at the required scale in order to achieve this commitment by 2025.

### SUPPLY CHAIN GREENHOUSE GAS EMISSIONS

**SCIENCE-BASED TARGET FOOTPRINT**

**Aim**
By 2030, in line with climate science, we'll reduce our indirect greenhouse gas emissions from upstream and downstream sources by at least 13.3 million tonnes.

**Progress**
We've modelled our total value-chain greenhouse gas emissions at around 6 million tonnes in total for 2016. This includes small quantities of emissions from operational waste and business travel (previously shown separately) but is mainly split equally between our Food and Clothing & Home product value-chains.

We've appointed specialist consultants, 3Keel, to help us collate data from existing Plan A activities that contribute carbon reductions, such as ‘Sustainable cotton’, ‘Sustainable food factories’ and ‘Reducing food waste’ and to help us develop new activities. We intend to start reporting on our progress for the first time in our 2019 Plan A Report.

### SUSTAINABLE ANIMAL PROTEIN

**Aim**
By 2019, we'll establish a new partnership to increase our understanding and definition of sustainable animal protein and report about the action we take to implement our findings.

**Progress**
We've developed a new partnership to start collating the data required to create a definition of sustainable animal protein and to assess how we might make improvements.

### FOOD SUPPLIER CLIMATE PLANS

**Aim**
By 2022, all of our strategic Food suppliers will be required to have implemented a 10-year strategic climate mitigation and adaptation plan.

ZERO WASTE IN M&S OPERATIONS

ZERO LANDFILL**

** Assured by DNV GL

Aim
We’ll maintain zero waste to landfill for M&S operations in the UK and ROI and extend this to our M&S and key franchise operations worldwide by 2025.

Progress
In 2017/18, our UK and ROI operations once again effectively recycled 100% of the waste generated in our stores, offices and warehouses (2008/09: 41%). Our total waste was down by 30%, to 81,000 tonnes compared with 116,000 tonnes in 2008/09. At present we’re only able to report on M&S operated stores in the UK and ROI.

* Includes a wide range of recycling technologies with energy-from-waste as a last option.

FOOD WASTE (REDUCTION)**

** Assured by DNV GL

Aim
By 2020, we plan to reduce food waste in our UK stores by 20% per sq ft against 2013/14. In addition, we will review opportunities to donate an increased amount of food to charities.

Progress
In 2017/18, our UK retail food waste was 3.86 tonnes per 1,000 sq ft of food sales floor, down 9% compared to 2013/14. This is Behind plan to reach 20% by 2020.

* UK M&S operated store retail food waste calculated by taking the total weight of unsold food collected and deducting averaged estimations for packaging, café and other types of waste.

By working with the Neighbourly social network, we ensured that 626 charities benefited from the redistribution of over 840 tonnes of surplus food (2014/15: 60 tonnes).

Between June 2015 and March 2018, we donated over 2.3 million meals to those in need.

REUSED SHOP FIT-OUT

Aim
By 2025, 95% (by weight) of equipment and other fit-out materials arising from UK and ROI store refresh/refurbishment projects will be reused.

CONSTRUCTION WASTE

Aim
By 2025, we’ll have reduced total waste from M&S Property activities (including packaging) in the UK and ROI by 50% against a newly developed baseline and will recycle at least 95% of the waste that’s produced.
**WATER CONSUMPTION**

**SUSTAINABLE COTTON**

**Aim**
We’ll source 100% of cotton from sustainable sources by 2019 and by 2025 will aim to have increased the proportion of Fairtrade, organic and recycled sources to 25%.

**Progress**
This year, 77% of the cotton sourced by suppliers for M&S products came from Better Cotton Initiative, Fairtrade, organic or recycled sources (last year 49%).

---

**SUPPLY CHAIN RAW MATERIALS**

**ZERO DEFORESTATION**

**Aim**
Building on the substantial progress we’ve already made, and in recognition of forest protection as part of climate change mitigation, we’re aiming to ensure zero deforestation from the use of palm oil, soy, cattle, wood and wood derived materials in the production of M&S products by 2020.

**Progress**
In 2016, we published our sourcing policies for palm oil, soy, cattle and paper materials.

As of April 2018:

**Palm oil:** In 2017/18, all the palm oil used in M&S products was Roundtable on Sustainable Palm Oil (RSPO) certified. *97% was a mix of segregated and mass balance (last year *90%), with the remaining *3% covered by the purchase of RSPO Credits (previously known as GreenPalm certificates) to encourage the transition to sustainable supplies.

**Soy:** Nearly all the soy used in M&S supply chains is in animal feed. We’ve communicated a standard for sourcing soy to our suppliers as part of an Animal Feed Code of Conduct. In 2017, we became signatories of the Cerrado Manifesto with the aim of protecting biodiversity in this region of Brazil and we remain members of the Amazon Soy Moratorium Customer Group.

We also purchased 15,000 Round Table for Sustainable Soy credits to match our Oakham chicken feed to support the transition to sustainable supplies. However, robust global systems of stewardship will need to be available for us to be able to achieve this commitment by 2020.

**Brazilian leather:** We already have sourcing policies and traceability assessments in place to ensure that none of the leather used in M&S products contributes to deforestation.

**Paper materials:** These are covered by our responsible paper sourcing policy and we’re currently developing plans for a new measurement system.

---

**PALM OIL USED IN M&S PRODUCTS CERTIFIED BY RSPO**

100%

* Calendar year data
SUPPLY CHAIN RAW MATERIALS CONTINUED

M&S FARMING FOR THE FUTURE**

Aim
From 2018, we’ll report on our use of animal welfare and environmental outcome-indicators for fresh meat, farmed fish, poultry, fresh milk and laying hens. We’ll use this data to shape future production standards and drive a continual improvement culture across our farm supply base.

Progress
We now intend to report on our animal welfare and environmental outcome-indicators covering fresh meat, farmed fish, poultry, fresh milk and laying hens.

Read more on Farming for the Future

We’ve also started using the results from these indicators to set best practice improvement targets with our suppliers.

CLOTHING & HOME ANIMAL WELFARE

Aim
By 2025, we’ll implement independently endorsed retail industry leading standards on animal welfare for Clothing & Home products.

SOIL HEALTH

Aim
By 2019, in collaboration with our suppliers and other partners, we will carry out and publish a detailed review of the potential for adopting restorative/regenerative agricultural practices aimed at improving soil organic matter, sequestering carbon and reducing the dependency on artificial inputs within our food supply base. We’ll then provide an annual update on our actions to implement.

Progress
We’ve started to conduct research with the consultancy, Forum for the Future, and plan to hold an initial workshop in 2018.

FOREVER FISH**

Aim
By 2021, we will strengthen our Forever Fish programme, rolling out globally best practice for crew welfare, expanding responsible fisheries management and advocating for policy reform to protect the marine environment.

Progress
Our Forever Fish programme currently includes work on social standards, education and sustainable sourcing.

We are involved in education partnerships with the Blue Marine Foundation and the Seafood School at Billingsgate Fish Market.

OUR WILD CAUGHT FISH SOURCING DATA FOR 2017/18

| 1. Sustainable practice applied or participating in a fisheries improvement project | 87 |
| 2. Working with WWF for improvement | 13 |

See Blue Marine Foundation: bluemarinefoundation.com
See Sea Food Training: seafoodtraining.org

RESPONSIBLY SOURCED RAW MATERIALS**

Aim
By 2025, the 50 key raw materials used for M&S products will come from sources verified as respecting the integrity of ecosystems, the welfare of animals and the wellbeing of people and communities. This will cover over 80% of M&S raw material usage by volume.

Progress
This commitment is currently being developed – please see our separate commitments on Sustainable cotton, Zero deforestation, M&S Farming for the Future, and Forever Fish.

SUPPLIER WATER STEWARDSHIP

Aim
By 2020, we’ll implement a programme to put in place water stewardship plans for our most material and at-risk watersheds in our Food and Clothing & Home supply chains.

** Assured by DNV GL
SUPPLY CHAIN RAW MATERIALS CONTINUED

CONSTRUCTION AND SHOP FIT PLAN A ATTRIBUTES

Aim
By 2025, all key products and materials used for construction fit out, shop fit, marketing décor and visual merchandise in our UK and ROI stores, offices and warehouses will have Plan A attributes that address all priority social, environmental and ethical impacts.

SUSTAINABLE FOOD FACTORIES**

Aim
By 2020, at least 95% of M&S Food (by volume) will come from factories that achieve Silver level on our Food Sustainability Scorecard and by 2025 at least 50% will achieve Gold level.

Progress
As of April 2018, the proportion of M&S Food products provided by Silver level suppliers had increased to 63% (last year 56%) as a result of the validated performance of 134 supplier sites. To achieve this standard, a site has to perform at Silver level or above across three areas: human resources, environment and resource efficiency.

Looking ahead to next year, we have reviewed and improved our Food Sustainability Scorecard by introducing better governance and a new fourth area called Supply Chain. We’ve also added an expanded Silver-flex category designed for small suppliers or those that only supply us with a small percentage of their total output. From next year, our data will be re-calibrated using this new approach.

FOOD PROVIDED BY SILVER LEVEL SUPPLIERS

63%

SUSTAINABLE CLOTHING & HOME FACTORIES

Aim
By 2025, at least 50% of M&S Clothing & Home products (by volume) will come from factories that achieve Gold level on a new Clothing & Home Sustainability Scorecard and 95% of other factories have achieved at least Silver.

CLOTHING & HOME SUPPLIER WATER EFFICIENCY**

Aim
By 2019, we’ll develop a credible methodology for measuring the water efficiency of our textile and garment wet processing and set targets for reduction by 2025.

Progress
We’ve adopted the widely used Higg Index as our credible methodology for measuring water efficiency in our Clothing & Home supply chain. We are now working with a consultancy to develop a roll-out programme for suppliers.

SUSTAINABLE PROPERTY SUPPLIERS

Aim
By 2025, at least 50% of all our major UK and ROI direct property suppliers will achieve Gold level on a new Property Sustainability Scorecard and 95% of our other major UK and ROI direct suppliers will have achieved at least Silver.

** Assured by DNV GL
This is our 13th annual report on our social and environmental performance. Published in June 2018, it covers our financial year from April 2017 to March 2018.

ABOUT PLAN A

UNDERSTANDING THIS REPORT

ABOUT M&S
Marks & Spencer (Marks and Spencer Group plc) is one of the UK’s leading retailers. We offer our customers mainly own-brand high quality, great value food, clothing and home products. There are 1,463 M&S stores worldwide and we employ 81,000 people. Our values are: Inspiration, Innovation, Integrity and In touch, and our core purpose is Making every moment special. Marks & Spencer is publicly listed on the London Stock Exchange and our principal trade associations are Eurocommerce, Confederation of British Industry and the British Retail Consortium. We are also a member of the World Economic Forum and Consumer Goods Forum.

STORES WORLDWIDE          EMPLOYEES

1,463           81,000

AUDIENCE
Our Plan A Report is written primarily for an external audience with an interest in our social and environmental (non-financial) performance. It contains detailed data and easy-to-read summaries. It complements our main Annual Report, which provides greater contextual information about the ways in which we create sustainable value.

Our Annual Report is written primarily for an investor audience. The Annual Report refers readers who require further details about social and environmental performance to the Plan A Report. We share the information in our reports with employees and customers in a number of different formats.

REPORT STRUCTURE
The Plan A Report 2018 contains senior management commentaries on our progress and explains how Plan A is creating value and supporting our overall strategy – of Making M&S Special Again. In addition, it provides a systematic update against the 100 commitments in our Plan A 2025 sustainability strategy, under the three headings of Wellbeing, Community and Planet.

The report also explains how we manage social and environmental issues through our Governance structure. Independent review is provided in the form of commentary and assurance. Key awards and benchmarks are listed at the end of the report.

We reserve the right to amend published commitments outside the final 12 months before their planned completion date. We will always highlight where commitments have been amended and explain the reasons why. We will not amend commitments inside their final 12 months of completion.

SCOPE
This report covers all M&S operated activities, which includes joint ventures where we have a majority ownership as well as retail operations in India which are a minority owned joint venture. It includes global data for greenhouse gas emissions, energy efficiency, gender diversity, employee Your Say survey results, work experience initiatives and community programmes. We are still developing our systems for operations outside of the UK and Republic of Ireland for waste, water, diversity (other than gender), employee turnover or health and safety. The report covers all M&S products, no matter where in the world they’re sold, but not the small proportion of non-M&S products we also sell. The report does not contain operational information relating to our business partners, for example, M&S Bank (operated by HSBC), M&S Energy (operated by SSE), or UK and international M&S stores operated under franchise.

DATA
During 2017/18, we completed the closure of M&S stores in 10 countries and announced the sale of our stores in Hong Kong to a franchise partner, as of 2018/19. Most of the data and statements in this report relate to the financial years 2017/18, 2016/17, and 2006/07 (our baseline year before the launch of Plan A). Where target completion years are stated as 2020 or 2025, these are taken as meaning by 31 March in that year, unless otherwise stated. To ensure consistency, we’ve included some calendar year data where this is used for other purposes in this format. This data is marked with an asterisk*. Where we refer to events which occurred after the end of our 2017/18 financial year, we’ve quoted a date.

In line with UK legislation, our 2006/07 baseline greenhouse gas emission calculations are now fixed, except when we need to retrospectively correct errors or include previously missing data. Greenhouse gas emissions for 2017/18 have been calculated using BEIS 2017 Greenhouse Gas Reporting Guidance, which includes a 15% lower carbon intensity rating for UK grid electricity that reduces our emissions by around 30,000 tonnes CO2e compared to our 2016/17 figures) and Bitzer 19 for additional refrigeration gases. 2018 is the fifth year in which we’ve used a dual approach for reporting greenhouse gas emissions. Renewable electricity tariffs and biomethane have been calculated in accordance with the March 2015 WRL/WBCSD Scope 2 Guidance on procured renewable energy to show a market-based figure alongside the legally mandated location-based data.
CATEGORISING OUR PERFORMANCE
The Plan A Report 2018 is our first report on progress against the 100 commitments published as Plan A 2025 in June 2017. All commitments are shown as Not achieved, Not started, Behind plan, On plan or Achieved. As this is a new eight-year sustainability programme we do not believe that all 100 commitments need to be started immediately and instead they will be phased to build on the learning from other commitments. We will only show a commitment as moving from Not started to On plan when there is confidence that there is a clear pathway to the target being achieved. However, in many cases, detailed preliminary work will still have been carried out on commitments shown as Not started.

CARBON NEUTRALITY
Stores, offices, warehouses and delivery fleets operated by Marks & Spencer or in joint ventures worldwide have been self-certified as carbon neutral, in accordance with British Standards Institution’s PAS2060 at 30 April 2018 for the period commencing April 2017 to 31 March 2018, with a commitment to maintain carbon neutrality at least up to 31 March 2025. This means that in addition to significantly reducing emissions and purchasing renewable electricity tariffs compliant with WRI/WBCSD Scope 2 Guidance on procured renewable energy, we have sourced a portfolio of high quality carbon credits, and a quantity equal to the remaining gross carbon emissions has been retired. You will find further supporting documentation at: marksandspencer.com/plana.

REPORT TECHNICAL STANDARDS
We’ve used our Plan A 2025 commitments to structure this report but also indicated how these support the United Nations Sustainable Development Goals launched in 2015. To provide a common index we’ve also referenced the Global Reporting Initiative Sustainability Reporting Standards, launched in 2016. See page 43 for more details. As a signatory to the United Nations Global Compact, this report forms part of our Communication of Progress as indicated by the reference table on page 43.

LEGAL COMPLIANCE
We had no environmental or health and safety prosecutions in 2017/18 and no work-related fatalities.

KEY IMPACTS, MATERIALITY AND ASSURANCE
Many different social, environmental and ethical issues have an impact on our business, either directly or through our global supply chains. Consequently, we have to manage a continually evolving set of issues. We have developed and updated our Plan A sustainability programme with the help of stakeholders in order to address our key social and environmental challenges. This version of Plan A, known as Plan A 2025, was launched in June 2017 and was used to determine the materiality of issues covered in this report, see: marksandspencer.com/plana.

For this report, Plan A 2025 commitments were assessed for their materiality and urgency by M&S management, which ranked them in terms of their ‘importance to stakeholders’ and ‘importance to M&S’ on a 3 x 3 matrix. The positions on the matrix were then reviewed and amended as necessary, in accordance with direction from our independent assurance provider, DNV GL.

Forty commitments and five additional indicators were rated as being of ‘high importance to stakeholders’ and either ‘high or medium importance to M&S’ (see below). DNV GL has been commissioned to provide independent assurance on these commitments using its proprietary VeriSustain standard, which is aligned with the principles and concepts of GRI guidelines, AA1000 AS and ISAE 3000. These are, denoted by ** in the performance section of this report. See the assurance statement on page 44. All other commitments were reviewed and assured by the Marks & Spencer Internal Audit team.

M&S ANNUAL REPORTS
Our 2018 Annual Report contains a comprehensive review of our financial performance and governance. It’s published online, along with this report. Both reports can be downloaded in PDF, large font and sound versions here.

## Stakeholder Relationships

### How We Engaged This Year

<table>
<thead>
<tr>
<th>Our Stakeholders</th>
<th>How We Listen</th>
<th>What They’ve Told Us</th>
<th>What We Did</th>
</tr>
</thead>
</table>
| **Customers**    | - Monitoring sales of products  
                   - Participation in Plan A activities and campaigns  
                   - Contacts to our Retail Customer Services  
                   - Feedback through our Plan A email  
                   - Customer research panels  
                   - Social media  
                   - Sparks Card charity donations | Our customers are still keen to support local and national charities.  
                                                                 From the end of 2017, our customers reflected national and international concerns about the use and disposal of plastic. | 6.1 million Sparks Card customers have donated over £4m to date to their chosen charity.  
                                                                 We were one of the founding signatories of the UK Plastics Pact and in addition to existing Plan A commitments announced further plans to reduce our usage of single-use plastic items. |
| **Employees**    | - Plan A Champions  
                   - Business Involvement Groups  
                   - Feedback through our Plan A email and Yammer social media  
                   - Annual Your Say survey  
                   - Participation in Plan A activities and campaigns | Our employees also reflected wider social concerns about the use and disposal of plastic items. | We’ve participated in many of these benchmarks and consultation groups where they are relevant to M&S and don’t duplicate existing activities. |
| **Shareholders** | - Annual General Meeting  
                   - Meetings with institutional investors  
                   - Shareholder panels  
                   - Survey of institutional investors  
                   - Ethical investment surveys | On sustainability, there is a growing interest in global indices for different sets of issues. Operating under the World Benchmarking Alliance the largest group is developing benchmarks based on the UN Sustainable Development Goals. | All our milk pools became RSPCA certified for animal welfare.  
                                                                 We’ve adopted the Higg Index for measuring and managing our supply chain water ‘footprint’. |
| **Suppliers**    | - Supplier conferences  
                   - Tendering processes  
                   - Supplier Exchange website and network  
                   - Visits and meetings  
                   - Agricultural Shows | Our suppliers continue to work closely with us on Plan A, in particular our Global Community Programme and the development of sustainability scorecards. | We have supported high environmental standards and recycling schemes that best meet the needs of our customers. |
| **Government and Regulators** | - Meetings  
                               - Dialogues with trade associations  
                               - Visits and meetings  
                               - Responses to consultations  
                               - Plan A stakeholder conference | Proposals for a 25 Year Environment Plan for the UK and deposit-return schemes for plastic drinks containers across the UK have been announced. | We have supported high environmental standards and continued our work on human rights in the supply chain. |
| **Non-Governmental Organisations** | - Visits and meetings  
                                      - Participation in benchmarking and surveys  
                                      - Joint projects  
                                      - Plan A stakeholder conference | Environmental NGOs have also been largely focused on the issue of plastic usage and its disposal. Social NGOs continue to be focused on Human Rights such as poverty and gender equality. | |
MANAGING PLAN A

In 2017, we introduced a revised governance structure. Integral to this structure was the creation of a new Plan A Committee. This new committee supports the Operating Committee by overseeing the implementation and reporting of our Plan A sustainability improvement programme.

The Plan A Committee meets every two months and its Chair updates the CEO and full Board at least once a year.

Our Director of Sustainable Business, Mike Barry, works together with a small team, comprising social, environmental and ethical specialists, to support all Plan A governance activities.

This team focuses on developing policies and solutions, building stakeholder relationships and managing risks.

PLAN A RISK PROFILE 2018

Details of our Principal Risks and Uncertainties are included in our 2018 Annual Report. This table summarises the key changes to our social and environmental risks during the past 12 months:

- Corporate Compliance and Responsibility – our ability to meet stakeholder expectations across a broad range of social, environmental and ethical concerns – is considered as a Principal Risk and Uncertainty.
- The use, recycling and disposal of single use plastic items and packaging became a high profile environmental concern towards the end of 2017.
- The reduction of food waste across the value chain as well as its re-distribution from stores continues to be a high-profile issue.
- Reducing the social impacts of M&S store re-locations and closures continues to be important to us.
- Human rights and modern slavery continues to be an important focus for corporate benchmarking and governments around the world.
- The UK’s decision to leave the European Union, and the changes associated with this decision, have created significant social and environmental uncertainties, as well as wider product sourcing uncertainties.
- The Task Force on Climate-related Financial Disclosure published guidance reflecting the growing importance of shareholder visibility of these types of risk.

INTEGRATING PLAN A

As Director of Sustainable Business, Mike Barry, oversees Plan A implementation, budget management and co-ordination. Plan A managers and specialists on relevant issues, including health and safety and supply chain social compliance, work in our Food, Clothing & Home, Retail, Finance, Property, Logistics, International and HR functions. Plan A Champions co-ordinate action across our stores and offices.

Many of our employees, including Executive Directors, have Plan A performance targets.

MANAGING SOCIAL, ENVIRONMENTAL AND ETHICAL RISKS

The Board completes a Group Risk Profile every six months. Details of our approach to risk management and a list of our Principal Risks and Uncertainties are included in our 2018 Annual Report. With regards to Plan A, only ‘Corporate Compliance and Responsibility’ – our ability to meet stakeholder expectations across a broad range of social, environmental and ethical concerns – is considered as a Principal Risk and Uncertainty, although we continue to monitor the development of specific high-profile issues such as climate change, human rights and the use of plastic.

We have also adopted the Task Force on Climate-related Financial Disclosure (TFCD)’s recommendations and our approved Science-Based Target for reducing greenhouse gas emissions meets the requirements of the most demanding 1.5°C scenario.

We developed our Plan A 2025 commitments to address key social and environmental risks. These have also been assessed against the materiality matrix published on page 36. All commitments are assured and the most important/urgent have been subject to external assurance. They are denoted by **.

CERTIFIED INTERNATIONAL SOCIAL, ENVIRONMENTAL AND ETHICAL STANDARDS

Like most other major retailers, we use our own, internally developed systems to keep pace in a fast-moving industry. These cover training, health & safety, environmental performance and quality. We’ve also followed a number of best practice standards in preparing this report (see About this Report for more details).

We regularly revise our Code of Ethics and Anti-Bribery Policy. Any breaches are reported to the Audit Committee.
COMMITTEE STRUCTURE

The Plan A Committee meets every two months and manages social and environmental performance on behalf of the Operating Committee. The Operating Committee reports to the PLC Board.

Alongside the Plan A Committee, we also operate a Human Rights and Modern Slavery Committee.

The Plan A Committee ensures external input through the Sustainable Retail Advisory Board, the Human Rights & Modern Slavery Committee does so through the Human Rights Advisory Stakeholder Group.

We also operate a network of operational working groups on issues such as human rights and climate change.

HOW PLAN A WORKS CONTINUED

COMMITTEE STRUCTURE
The Plan A Committee meets every two months and manages social and environmental performance on behalf of the Operating Committee. The Operating Committee reports to the PLC Board.

Alongside the Plan A Committee, we also operate a Human Rights and Modern Slavery Committee.

The Plan A Committee ensures external input through the Sustainable Retail Advisory Board; the Human Rights & Modern Slavery Committee does so through the Human Rights Advisory Stakeholder Group.

We also operate a network of operational working groups on issues such as human rights and climate change.

Read more on human rights
To be fair, M&S saw this coming back in 2015, leadership here as it has in so many other areas. Will be expected to demonstrate the kind of scale for a long time to come. Which means M&S will stay right up there on the public visibility prominence – for all sorts of different reasons. I suspect that the horror story of plastic waste indifference. That's what happened in 2017, when the build-up of plastic waste in our oceans at last crossed that threshold, and forced politicians and businesses to rethink years (if not decades!) of neglectful indifference.

I suspect that the horror story of plastic waste will stay right up there on the public visibility scale for a long time to come. Which means M&S will be expected to demonstrate the kind of leadership here as it has in so many other areas.

To be fair, M&S saw this coming back in 2015, when the targets for Plan A 2025 were first being discussed. Plans were afoot even as Blue Planet II was airing. But by their own acknowledgement, the gaps between anticipation, planning and decisive action are sometimes too drawn out inside M&S. The radar works well, acting on that intelligence definitely needs to be sharpened up.

Which is why our Sustainable Retail Advisory Board is focused as much on the foundations that enable a sustainability strategy like Plan A as on individual issues in the public domain. Take transparency, for instance. In survey after survey, a big majority of consumers profess to care deeply about transparency, but only a tiny minority ever put a company’s performance to the test.

We have to be thankful when critical sustainability issues that have been languishing in relative obscurity are suddenly lifted up into stark public prominence – for all sorts of different reasons. That’s what happened in 2017, when the build-up of plastic waste in our oceans at last crossed that threshold, and forced politicians and businesses to rethink years (if not decades!) of neglectful indifference.

I suspect that the horror story of plastic waste will stay right up there on the public visibility scale for a long time to come. Which means M&S will be expected to demonstrate the kind of leadership here as it has in so many other areas.

To be fair, M&S saw this coming back in 2015, when the targets for Plan A 2025 were first being discussed. Plans were afoot even as Blue Planet II was airing. But by their own acknowledgement, the gaps between anticipation, planning and decisive action are sometimes too drawn out inside M&S. The radar works well, acting on that intelligence definitely needs to be sharpened up.

Which is why our Sustainable Retail Advisory Board is focused as much on the foundations that enable a sustainability strategy like Plan A as on individual issues in the public domain. Take transparency, for instance. In survey after survey, a big majority of consumers profess to care deeply about transparency, but only a tiny minority ever put a company’s performance to the test.

So here’s a quick interactive challenge for you! Since we’re online, take a look at M&S’s interactive ‘transparency map’ on their website and then email me to tell me what you think. We think it’s great, but it can still be improved.

It’s the same story on metrics. One of the reasons why Plan A is so respected is the extraordinary amount of data that is monitored, verified and then reported on. Most people who love M&S, and trust what it stands for, know very little about the finer details of all that – but if it wasn’t happening, that trust could ebb away overnight.

For instance, just flick back to page 27 and check out the data on M&S’s CO2 emissions and carbon neutral operations. Most of that data will be so much gobbledygook to most people, but it demonstrates just how comprehensive and rigorous M&S has to be, year after year, across every facet of its operations, to maintain its leadership in this area.

So I guess this is a bit of a shout out for all those crunching the numbers behind the scenes, invisible to anyone outside of M&S (and often to many people inside M&S), on whom the entire edifice of trust, accountability and transparency ultimately depends.

JONATHON PORRITT
FOUNDERING DIRECTOR, FORUM FOR THE FUTURE

We are witnessing huge shifts in attitudes and realities across business and society, and institutions are working out how to survive and thrive in this new world. Companies like M&S face the challenge of maintaining trust in the post #MeToo environment, when radical transparency is becoming a reality, and competitive pressures are at unprecedented levels. Key to maintaining trust is the ongoing demonstration of dignity and respect in the way companies interact with employees, customers and the people who help develop and deliver their products and services.

M&S, with its historically high trust levels, is well positioned, even in tough times, to connect and align with deeper issues in society and enhance its place in the market for decades to come.

But to preserve this trust, and the value it creates for the company, M&S must redouble its efforts to ensure that respect for human rights is central to how business gets done. We urge M&S to take the high road to demonstrate positive human rights impacts. Its contribution to sustainable development depends on it doing so. And in this era of disruption, where the intangibles of trust and reputation make up much of any brand’s financial valuation, offering human rights leadership in action as well as words will be essential.

While M&S is performing very well in human rights benchmarks, its high scores tend to be derived from excellent policies and commitments, rather than demonstrable positive change. We urge M&S to review its human rights commitments, identify an impact target for each and publish progress, making sure to report on the different impacts on men and women. Further, we are concerned that performance against the human rights targets in this report is slower than anticipated with 12 out of 20 human rights commitments either Behind plan or Not started. We would counsel against complacency.

M&S is at a crossroads, it has the opportunity to preserve its historic trust advantage, or the option of taking the low road. We urge M&S to take the high road to demonstrate positive human rights impacts. Its contribution to sustainable development depends on it doing so. And in this era of disruption, where the intangibles of trust and reputation make up much of any brand’s financial valuation, offering human rights leadership in action as well as words will be essential.

To the management of Marks and Spencer Group plc

INDEPENDENT ASSURANCE STATEMENT

Marks and Spencer plc ("M&S") commissioned DNV GL Business Assurance Services UK Limited ("DNV GL", "we", or "us") to undertake independent assurance of its Plan A Report 2018 (the "Report") for the 52 weeks ended 1st April 2018.

SCOPE AND APPROACH

We performed our work using DNV GL’s assurance methodology VeriSustain, which is based on our professional experience, international assurance best practice including the International Standard on Assurance Engagements 3000 ("ISAE 3000"), and the Global Reporting Initiative ("GRI") Sustainability Reporting Guidelines. We evaluated the Report for adherence to the VeriSustain Principles (the "Principles") of stakeholder inclusiveness, materiality, sustainability context, completeness, and reliability. We evaluated the performance data using the reliability principle together with M&S data protocols for how the data are measured, recorded and reported.

We understand that the reported financial data and information are based on data from M&S Annual Report and Accounts, which are subject to a separate independent audit process. The review of financial data taken from the Annual Report and Accounts is not within the scope of our work.

LEVEL OF ASSURANCE

We planned and performed our work to obtain the evidence we considered necessary to provide a basis for our assurance opinion. We are providing a ‘limited level’ of assurance. A ‘reasonable level’ of assurance would have required additional work at Group and site level to gain further evidence to support the basis of our assurance opinion.

DATA IN SCOPE

We evaluated the 40 highly material Plan A commitments and five indicators, annotated with ‘**’ in the Report (the "Selected Performance Information"), using the reliability principle for how the data are measured, recorded and reported.

WITHOUT AFFECTING OUR ASSURANCE OPINION, WE ALSO PROVIDE THE FOLLOWING OBSERVATIONS:

M&S Plan A reporting is extensive, covering one hundred commitments and data indicators. This Report marks the launch of Plan A 2025, which builds on the current Plan A ambition and places a greater focus on the customer under the three pillars of Wellbeing, Community and Planet.

STAKEHOLDER INCLUSIVENESS

The participation of stakeholders in developing and achieving an accountable and strategic response to sustainability.

We saw a good level of stakeholder engagement and inclusiveness related to the Plan A commitments, and the views of a range of internal and external stakeholders are disclosed in the Report through examples and case studies. Some examples include engaging with representatives from local communities to understand their priority issues (See Helping transform communities), discussions with charities and other interest groups on the preferred use of M&S spaces (See UK Community space), and engaging with food suppliers to help them progress to Silver and Gold validations (See Sustainable Food Factories).

RELIABILITY AND QUALITY

The accuracy and comparability of information presented in the Report, as well as the quality of underlying data management systems.

M&S has well-established processes for compilation of performance data from its operations to corporate level systems. We noted continuing reorganisation at the M&S Head Office, which poses a potential risk of technical and analytical capability being lost in several areas, which will likely impact on continuity of data for the following year, if this is not actively managed.

We found a limited number of non-material errors and omissions and these were corrected prior to inclusion in the Report. These errors were not systemic. We reinstate our previous recommendation that data compiled from various sources, especially when manual processes are involved, are periodically reviewed, checked against source evidence and formally signed-off.

How much of all the information that has been identified as material to the organisation and its stakeholders is reported.

The Report provides a good overview of performance across the organisation, at corporate and operational levels, and includes upstream and downstream impacts of M&S operations and products. The Report covers the organisation’s impacts over an extended time frame, including long-term strategic and operational objectives and targets and historic performance on key performance data.
Reporting or equivalent document). We have noted that M&S plans to publish this next year, and a Basis of Reporting document has already been initiated for some commitments such as energy efficiency.

We acknowledge the increased levels of ambition of Plan A 2025 and how this makes delivering the commitments more challenging. We observed several commitments that are not started and due to be delivered with a longer timeframe (e.g. Next generation technologies, Recyclable packaging, All food eaten by people, Colleague health assessment). However given the complexity of the issues and stakeholders involved, we consider them to be at risk of not being met if not adequately managed, as there is currently no defined ownership or investment plan to deliver these commitments.

### Basis of Our Opinion

A multi-disciplinary team of sustainability and assurance specialists performed work at M&S Head Office. We undertook the following activities:

- Review of the current sustainability issues that could affect M&S and are of interest to stakeholders;
- Review of M&S approach to stakeholder engagement and recent outputs;
- Review of information provided to us by M&S on its reporting and management processes relating to the Principles;
- Interviews with selected senior managers responsible for management of sustainability issues, selected in conjunction with DNV GL, and review of selected evidence to support issues discussed;
- Interviews with content and data owners and review of progress made in relation to the Selected Performance Information, annotated with ‘**’ in the Report, and review of how related data is measured, recorded and reported using the reliability and quality principle together with M&S data protocols. These commitments and indicators were selected based on materiality at a consolidated corporate level, and
- Visits to the Head Office in London, United Kingdom to review process and systems for gathering, preparing and consolidating the Selected Performance Information, including sample checking of source data and data consolidation.

For and on behalf of DNV GL Business Assurance Services UK Limited, London, UK.

### Responsibilities of the Directors of M&S and of the Assurance Providers

The Management of M&S have sole responsibility for the preparation of the Report. In performing our assurance work, our responsibility is to the management of M&S; however, our statement represents our independent opinion and is intended to inform all stakeholders. DNV GL was not involved in the preparation of any statements or data included in the Report except for this Assurance Statement. We have no other contract with M&S.

DNV GL’s assurance engagements are based on the assumption that the data and information provided by the client to us as part of our review have been provided in good faith. DNV GL expressly disclaims any liability or co-responsibility for any decision a person or an entity may make based on this Independent Assurance Statement.

### Independence

DNV GL’s established policies and procedures are designed to ensure that DNV GL, its personnel and, where applicable, others are subject to independence requirements (including personnel of other entities of DNV GL) and maintain independence where required by relevant ethical requirements. This engagement work was carried out by an independent team of sustainability assurance professionals.

DNV GL Business Assurance Services UK Limited is part of DNV GL – Business Assurance, a global provider of certification, verification, assessment and training services, helping customers to build sustainable business performance.
